Overview - Transforming Safety from Policy to Practice

We help organizations prevent high-consequence safety failures by addressing risk where it is created — before incidents, audits, or losses force change.

Safety as a Core Design Principle

We view safety not as a regulatory burden, but as a fundamental design principle and a driver of operational excellence, enhancing business value.

Comprehensive HSSEF Solutions

Led by Mr. Chandarsingh Mehta, our expertise delivers practical solutions through Health, Safety, Security, Environment, Fire, and Risk Management.

Overview - Transforming Safety from Policy to Practice

Built-in, Not Bolted-on Philosophy

Our core philosophy ensures safety is integrated from the start, providing lasting protection and fostering a truly safe environment.

Lifecycle Integration for Sustainable Culture

We integrate safety from concept to ongoing operations, ensuring a sustainable, compliant, and continuously improving safety culture protecting assets, people, and reputation.

Most safety failures are not caused by lack of rules – but by gaps between intent, design, and execution.

We help organizations prevent high-consequence safety failures by addressing risk where it is created – before incidents, audits, or losses force change.

Vision & Mission

Vision Statement

To be the globally recognized partner for transforming safety from a required policy to an integral, value-driving design principle that fosters operational excellence and sustainable success for organizations worldwide.

Mission Statement

Our mission is to embed strategic Health, Safety, Security, Environment, Fire, and Risk Management (HSSEF) expertise into every stage of the business life cycle, from concept design through governance. Led by over 34 years of international experience, we deliver comprehensive, practical, and customized solutions that build a resilient, compliant, and continuously improving safety culture for our clients.

Transforming Safety: The Integrated Approach

At [InSafety Services](#), we transform Health, Safety, Security, Environment, Fire, and Risk Management (HSSEF) from a compliance obligation into a core design principle and a driver of operational excellence.

Our solutions, led by global safety expert [Mr. Chandarsingh Mehta](#) (34+ years of international experience), are not an afterthought — they are built-in, not bolted-on. We partner with organisations across the entire business life-cycle, from leadership intent and concept design through operational execution and governance.

The Challenge:

Most safety failures are not caused by lack of rules — but by gaps between intent, design, and execution. As a result, safety is often treated as a documentation exercise, leading to reactive fixes, audit-driven compliance, and fragile operational control.

The InSafety Solution:

We deliver comprehensive, practical, and customised HSSEF solutions that address risk where it is created — at the level of decisions, systems, and frontline work.

Our approach integrates leadership intent, engineering and system design, workforce behaviour, and operational controls to ensure safety is effective in practice, not just compliant on paper.

□ Clients typically engage us to solve one critical risk problem — and continue with us because we connect safety, risk, and business performance end-to-end.

Why Choose InSafety Services?

Choosing a safety partner isn't just about compliance — it's about strategic risk leadership.

Organizations engage InSafety Services because we address risk where it is created: in decisions, designs, systems, and behaviors — not only after incidents, audits, or failures.

We connect safety, risk, and business performance end-to-end across the entire lifecycle.

Unmatched Global Expertise & Leadership

Our firm is founded and led by Mr. Chandarsingh Mehta, a global safety professional with over 34 years of international experience across diverse sectors. You don't just hire a consultant; you gain access to decades of strategic insight applied across Health, Safety, Security, Environment, Fire, and Risk Management (HSSEF). We bring proven solutions that work in any regulatory environment.

Strategic Integration: Safety is Built-In, Not Bolted On

Unlike firms that offer retroactive fixes, our core philosophy is to embed safety at the design stage. We work across your entire business lifecycle, from concept and planning through governance, ensuring your systems are inherently safe and compliant. This proactive, transformative approach minimizes risk, prevents costly redesigns, and future-proofs your assets.

Comprehensive, Practical Solutions

We deliver solutions that are not only compliant but also practical and customized for your organization's unique challenges and goals. Our focus is on achieving a sustainable, continuously improving safety culture that is manageable, effective, and fully integrated into your operations, ensuring tangible results and protected reputation.

Direct Impact on Business Value

Our services go beyond avoiding penalties or incidents. We help organizations:

- Safeguard critical assets — people, infrastructure, operations, and reputation
- Reduce high-consequence risk through risk-led design and governance
- Improve operational reliability and efficiency
- Build regulator and stakeholder confidence
- Enable sustainable, long-term business performance

Ready to transform safety from a policy obligation into a competitive advantage?
Start a risk conversation with InSafety Services.

Leadership

Chandarsingh Mehta

Founder and Principal Consultant, InSafety Services

A recognized leader in occupational health, safety, and environment, Mr. Mehta has led enterprise-wide EHS transformations for multinational organizations over a 34+ year international career. His global experience across APAC and AMEA spans chemicals, logistics, steel, manufacturing, IT, and banking sectors.

His leadership has shaped enterprise-wide EHS transformations for:

Leadership

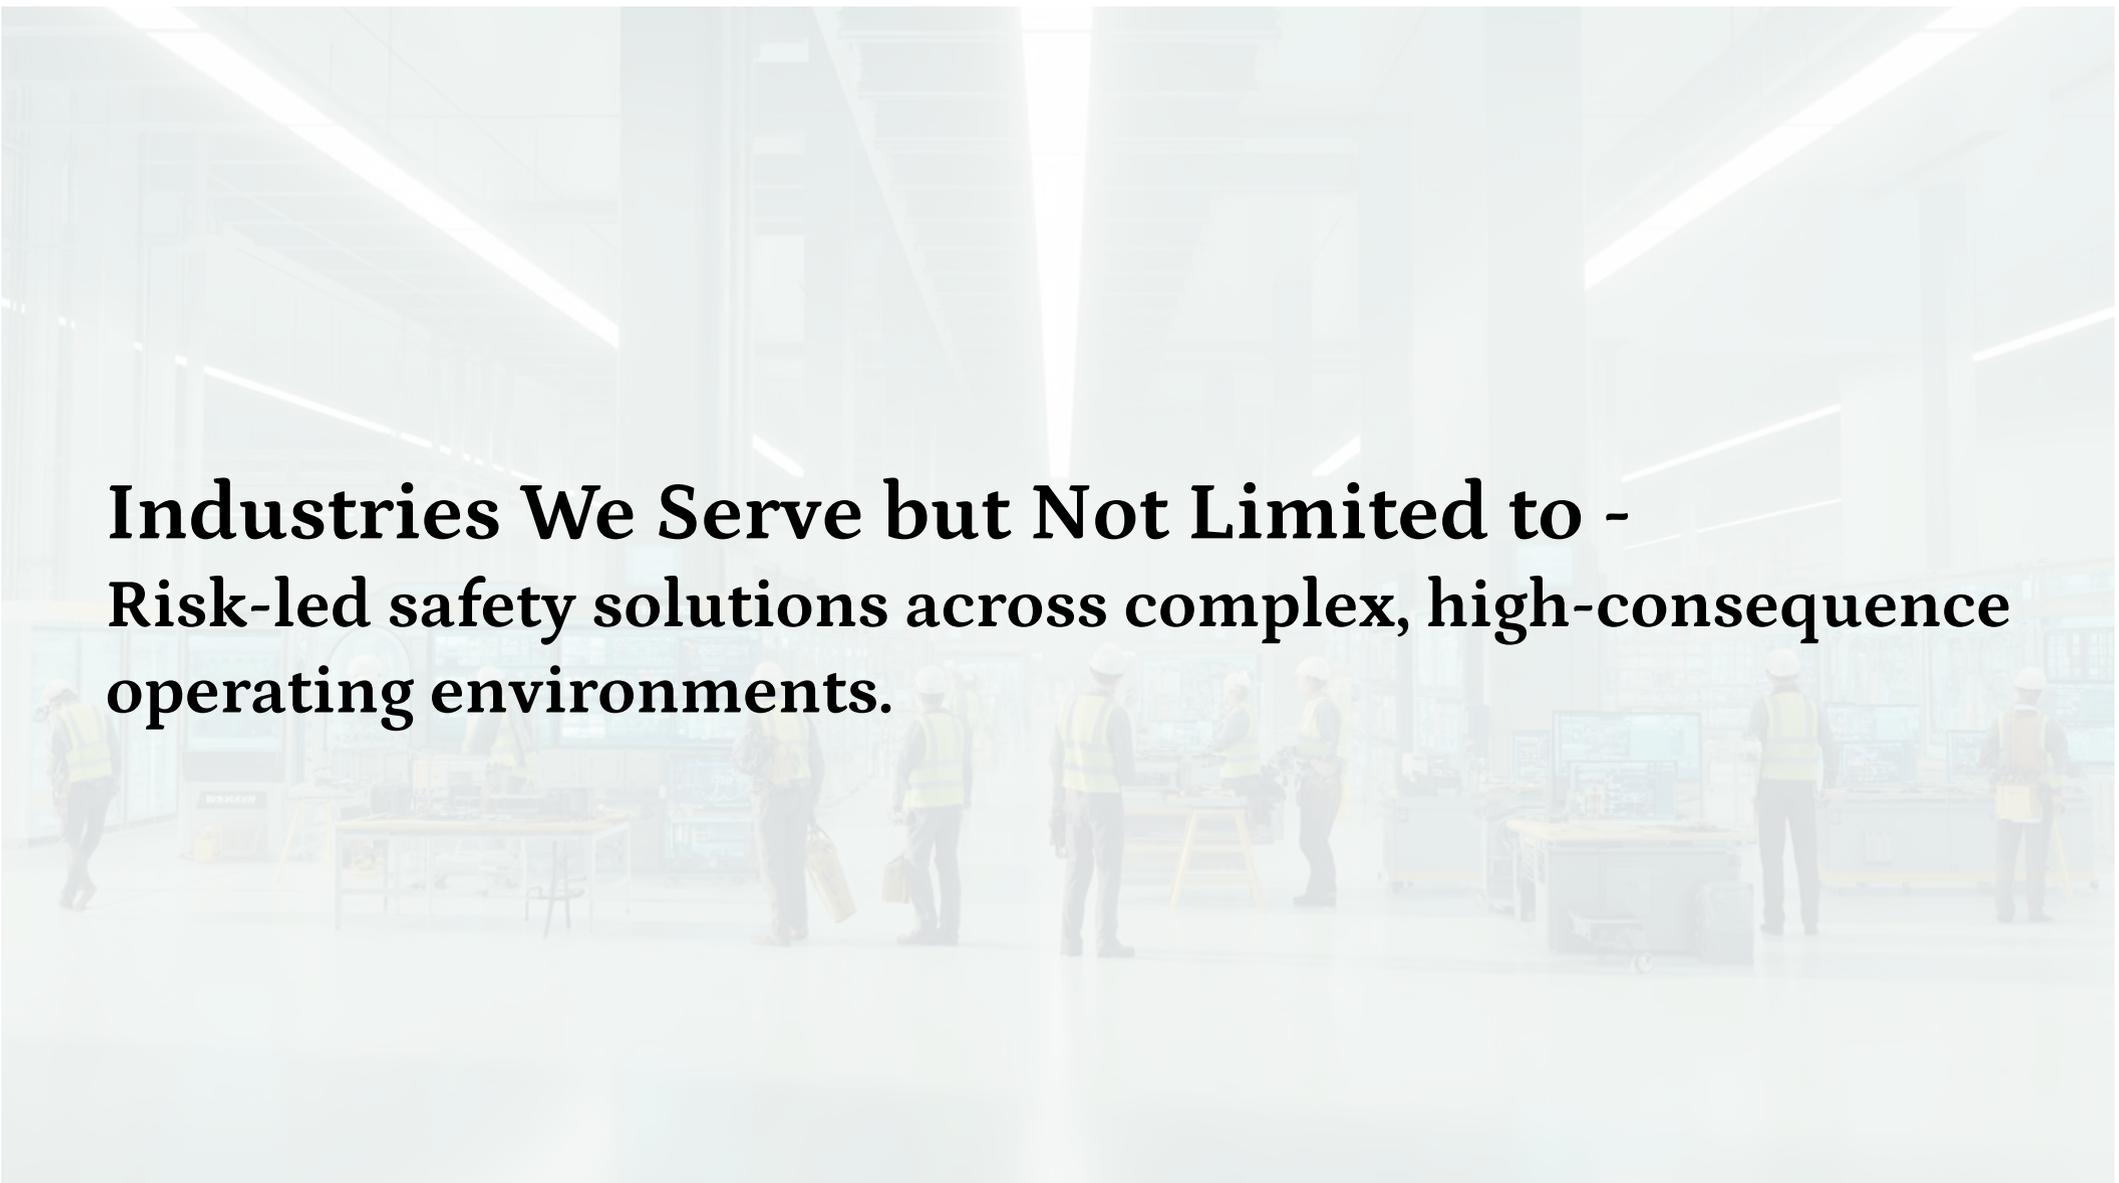

Chandarsingh Mehta

Areas of Specialization but not limited to:

Global OHS Strategy & Governance	HSSE Culture & Behavioral Safety Transformation
Environmental, Social, and Governance (ESG) Integration	Regulatory Compliance & Management Systems (ISO 45001, ISO 14001, NFPA, NBC)
Digital EHS / Safety Technology Implementation	Safety by Design / Prevention through Design (e.g Life Safety Code-NFPA-101)
Crisis, Emergency & Business Continuity Management	Contractor Safety & Supply Chain Risk Management
Fleet, Transport & Road Safety Management	Specialized Access & Complex Work-at-Height Solutions

**Industries We Serve but Not Limited to -
Risk-led safety solutions across complex, high-consequence
operating environments.**

Comprehensive HSSEF Expertise Across All Sectors

InSafety Services delivers integrated Health, Safety, Security, Environment, Fire, and Risk Management (HSSEF) solutions across diverse industries and operating contexts.

Our philosophy — safety is built-in, not bolted-on — enables us to integrate risk controls at the design, planning, execution, and governance stages, regardless of sector complexity, scale, or maturity.

If your industry is not listed, our methodology remains fully applicable.

Industries in the following pages are grouped by risk environment and asset complexity rather than by sector labels alone, reflecting how risk is actually created and managed.

Retail, Real Estate, Technology & Food Services

Retail

- Clothing stores
- Supermarkets and grocery stores
- Electronics stores
- Furniture stores
- Specialty stores (jewelry, sports equipment, toys)
- Online marketplaces and e-commerce platforms
- Vintage and thrift stores
- Pet stores
- Art and craft stores

Real Estate

- Property development companies
- Real estate agencies
- Property management firms
- Commercial and residential construction companies
- Architecture firms
- Real estate investment trusts (REITs)
- Vacation home rental companies
- Co-working spaces and shared office providers
- Property valuation and appraisal services
- Malls and Commercial Spaces
- Cooperative housing and residential buildings

Technology

- Software development companies
- IT consulting firms
- Telecommunications providers
- Hardware manufacturers
- Cybersecurity companies
- Data Centers and Analytics firms
- Artificial intelligence (AI) startups
- Augmented and virtual reality companies
- Cloud Infrastructure and Computing

Food and Beverage

- Restaurants
- Cafes and coffee shops
- Bars and pubs
- Bakeries and pastry shops
- Ice cream parlors
- Food delivery services and Cloud Kitchens
- Catering services
- Specialty food stores
- Breweries and wineries

Financial Services, Hospitality, Manufacturing & Healthcare

Financial Services

- Banks and credit unions
- Insurance companies
- Investment firms and brokerages
- Accounting firms
- Financial technology (Fintech) startups
- Payment processing companies
- Credit card companies
- Wealth management firms
- Crowdfunding platforms

Hospitality and Tourism

- Hotels and resorts
- Travel agencies
- Tour operators
- Event management companies
- Theme parks and amusement parks
- Cruise lines
- Bed and breakfast establishments
- Vacation Rental Platforms
- Adventure tourism operators

Manufacturing

- Automobile manufacturing
- Electronics manufacturing
- Textile and clothing manufacturing
- Consumer goods manufacturing
- Pharmaceutical manufacturing
- Food processing and packaging
- Furniture manufacturing
- Chemical manufacturing
- Metal fabrication and manufacturing

Health and Wellness

- Hospitals and medical centers
- Clinics (dental, chiropractic, veterinary)
- Pharmacies and drugstores
- Fitness centers and gyms
- Yoga and meditation studios
- Spas and wellness centers
- Nutritional supplement companies
- Mental health services
- Elderly care facilities
- Telehealth Providers

Education, Entertainment, Automotive & Energy

Education and Training

- Schools and universities
- Online education platforms
- Training institutes and vocational schools
- Tutoring services
- Language schools
- Corporate training providers
- Education technology (EdTech) startups
- E-learning content creators
- Educational consulting firms

Entertainment and Media

- Film production companies
- Television networks and streaming services
- Music industry
- Publishing companies
- Advertising agencies
- Public relations firms
- Social media platforms
- Gaming industry
- Influencer marketing agencies

Automotive

- Automobile dealerships
- Car rental services
- Auto repair and maintenance shops
- Auto parts manufacturers
- Electric vehicle (EV) startups
- Car-sharing and ride-sharing platforms
- Automotive technology companies
- Tire manufacturers and retailers
- Automotive accessories stores

Energy & Utilities

- Power generation companies
- Renewable energy providers
- Water supply companies
- Waste management services
- Energy consulting firms
- Smart Grid, Microgrid, and Energy Storage
- Energy storage solutions providers
- Electric utilities
- Environmental services companies

Consulting, Transportation, Agriculture & Emerging Industries

Consulting

- Management consulting firms
- Human resources (HR) consulting companies
- Marketing consulting agencies
- Strategy consulting firms
- Technology consulting firms
- Sustainability consulting firms
- Financial consulting companies
- Supply chain consulting firms
- Healthcare consulting firms

Transportation and Logistics

- Shipping companies
- Freight forwarding services.
- Courier and delivery services
- Logistics providers
- Warehousing and distribution centers
- Third-party logistics (3PL) companies
- Supply chain management firms
- Last-mile delivery startups
- Package tracking and logistics technology companies

Agriculture and Farming

- Crop farming
- Livestock production
- Dairy farms
- Organic food businesses
- Aquaculture farms
- Hydroponics and vertical farming
- Agricultural technology startups
- Seed and fertilizer manufacturers
- Farm equipment suppliers

Emerging Industries

- Blockchain technology and cryptocurrencies
- Clean energy and sustainable technologies
- Space exploration and aerospace industry
- 3D printing and additive manufacturing
- Robotics and automation
- Biotechnology and genetic engineering
- Personalized medicine and health-tech
- E-commerce and online marketplaces
- Smart home technology and Internet of Things
- Sustainable Technologies (ESG/Green)

Services & Solutions: Transforming Your Safety Lifecycle

The following categories group our specialized services to reflect our strategic approach to safety transformation (Plan-Do-Check-Act).

1. Strategic Design & Risk Integration

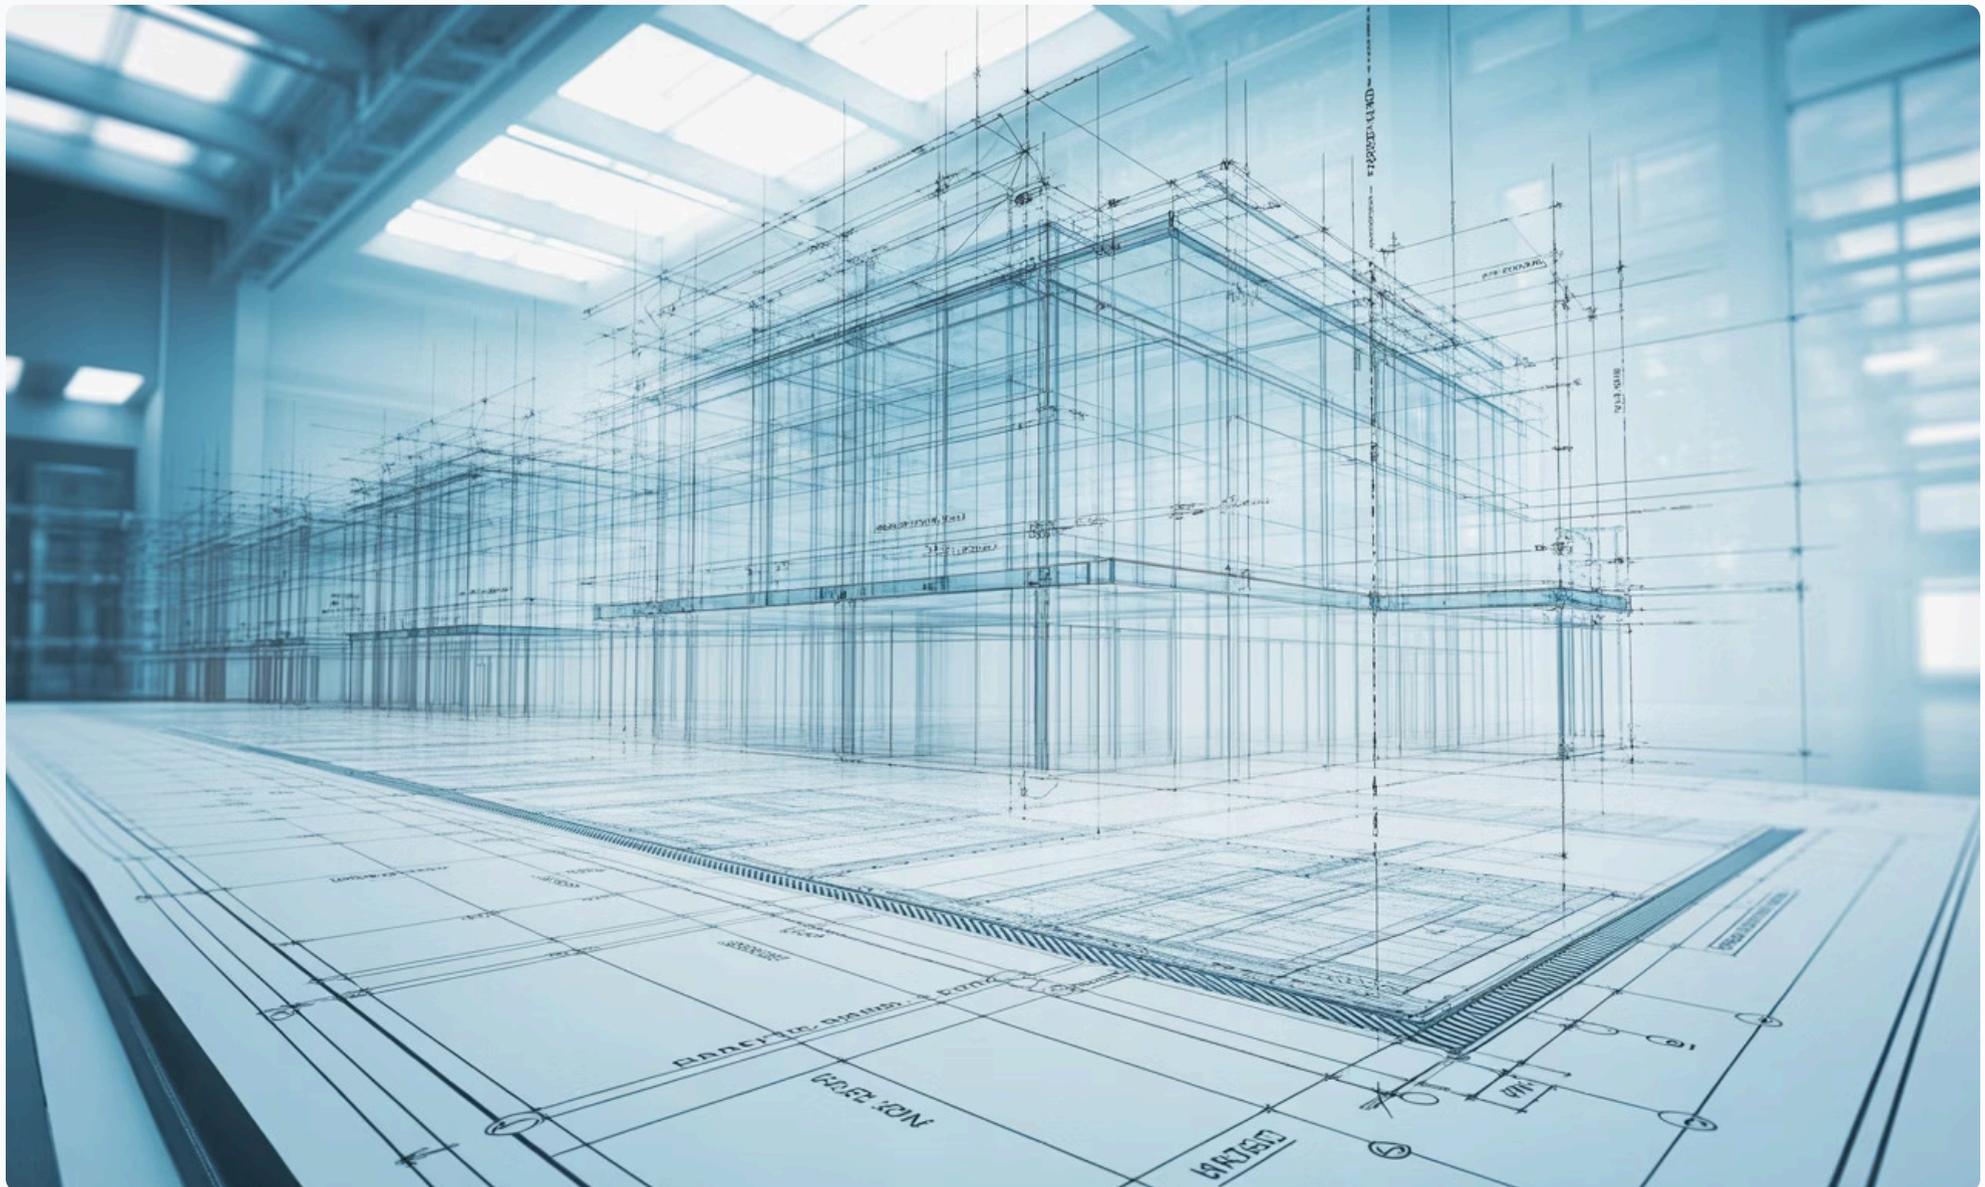

Core Focus: Building Safety and Resilience into Your Assets and Operations from the Concept and Planning Stages.

Safety that is designed in is safer, more efficient, and more compliant. Our strategic services ensure that risk is quantified, mitigated, and controlled before construction or implementation begins, reducing costly rework and ensuring long-term sustainability.

1

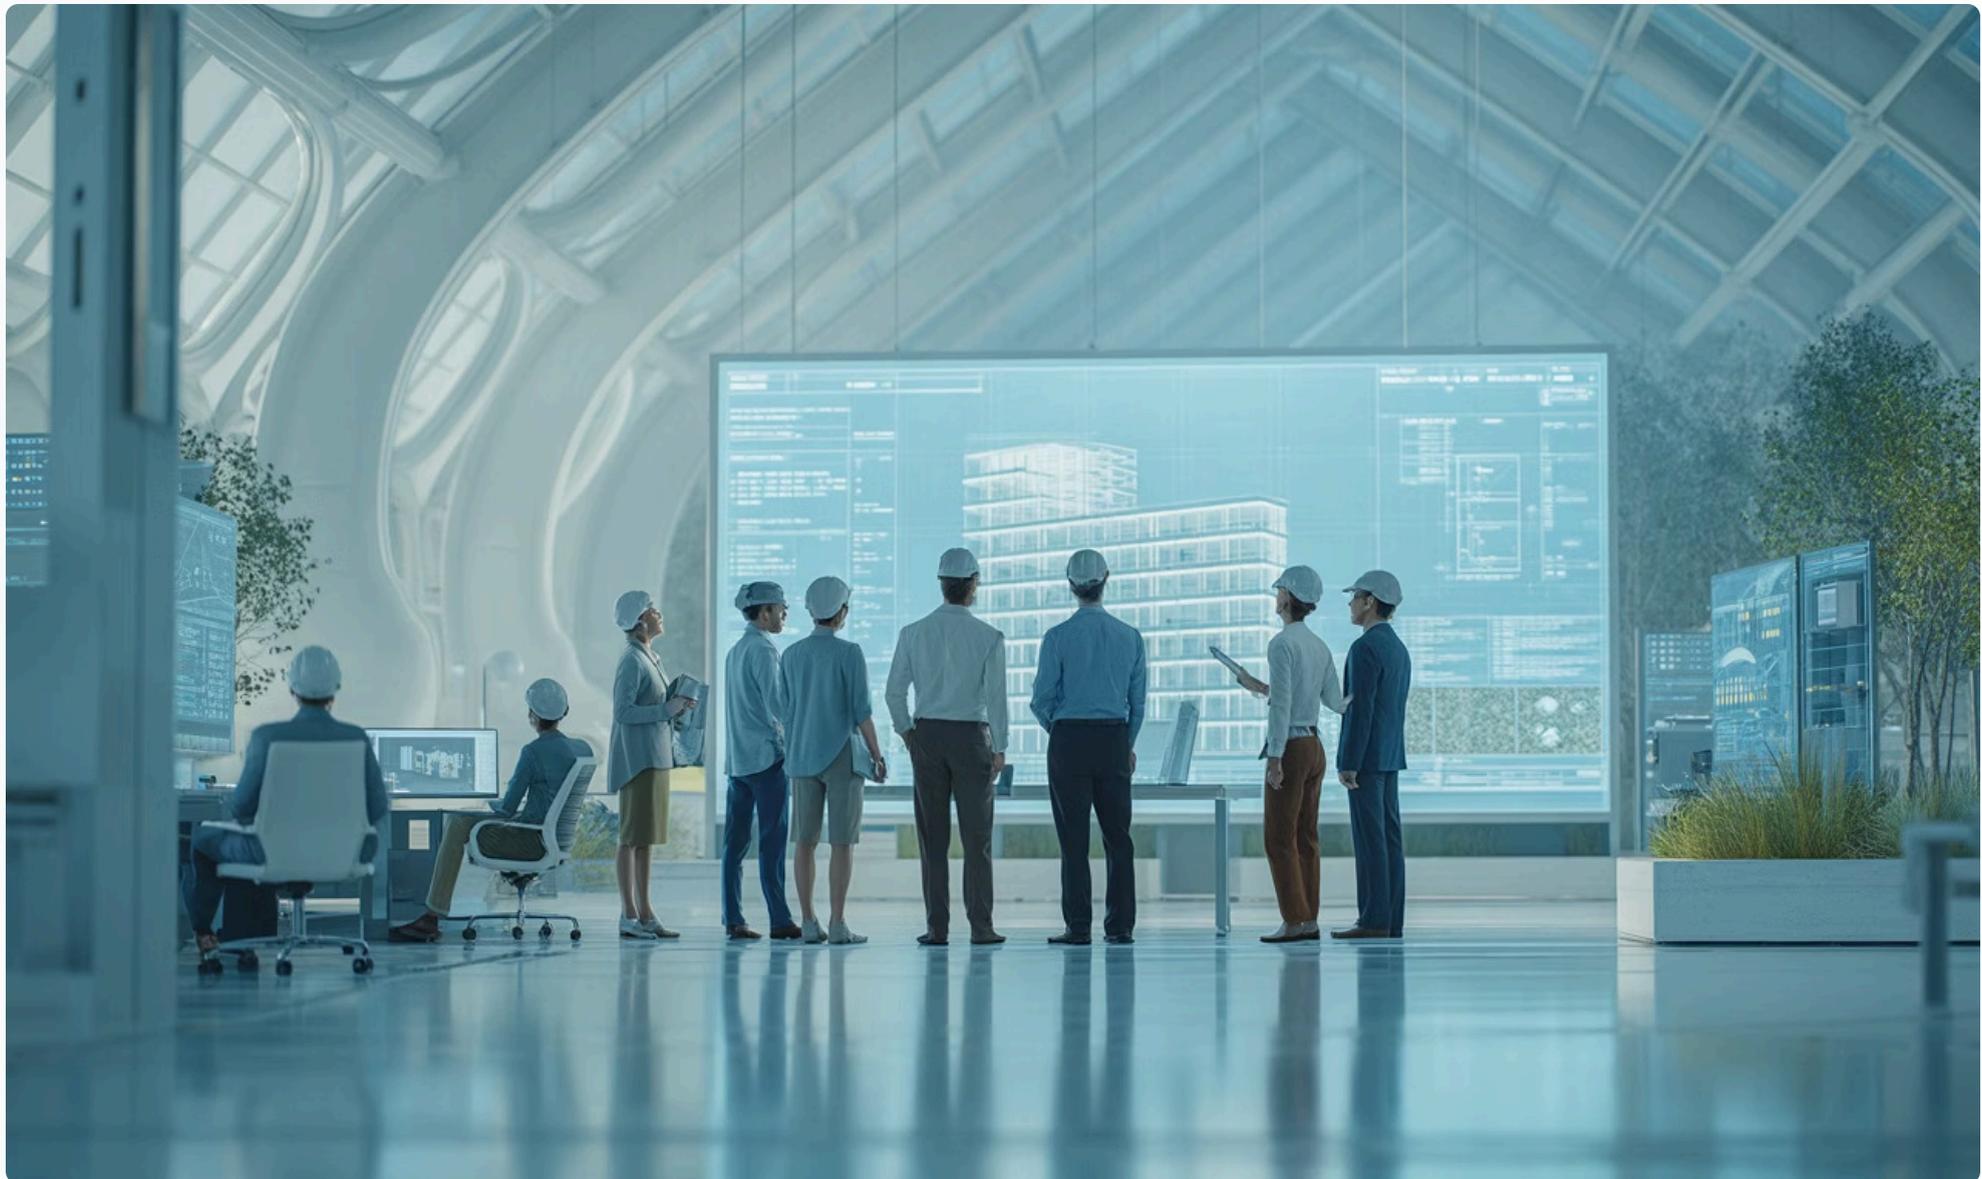

Life Safety Code Design (NFPA-101/NBC)

Code Consulting and Compliance Review

Comprehensive Design Services

- Site Planning and Design
- Structural Design and Analysis
- Fire Safety Engineering
- Accessibility Design
- Electrical and Plumbing Design
- Green Building Design and Sustainability
- Construction Oversight and Inspection
- Regulatory Compliance Assistance

Strategic Risk Quantification & Mitigation

01

Risk Identification

03

Risk Analysis and Quantification

05

Risk Assessment Methodology Development

02

Risk Evaluation

04

Risk Mapping and Visualization

06

Risk Mitigation Strategies

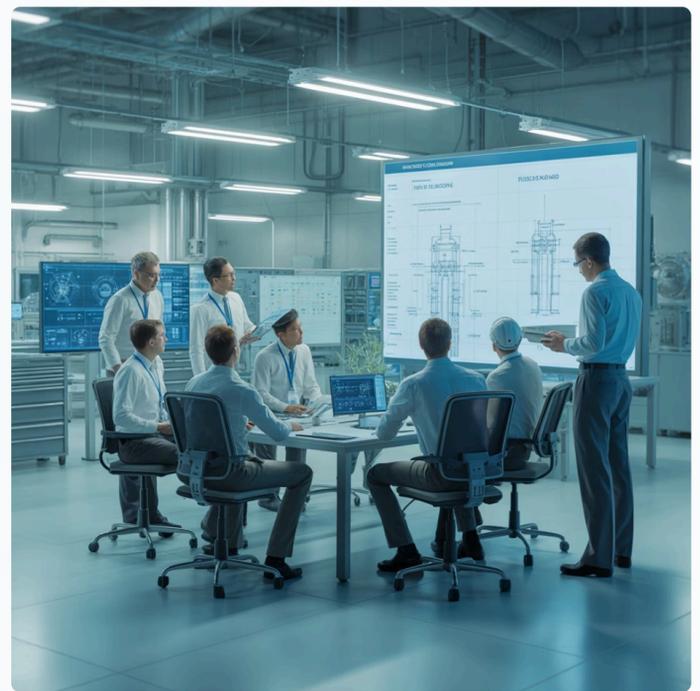

Business Impact Analysis & Risk Monitoring

- Business Impact Analysis (BIA)
- Risk Monitoring and Review
- Compliance and Regulatory Support
- Risk Communication and Reporting
- Training and Education

Design Safety Review (DSR) & HAZOP Facilitation

High-level, dedicated advisory service for concept and pre-design risk reviews. Facilitation of Hazard and Operability (HAZOP) Studies. Safety in Design Workshops.

Warehouse Design for Dangerous Goods

1. Designing a hazardous material warehouse requires careful consideration of safety, compliance, and efficiency.
2. Hazardous Material Storage Consultation
3. Compliance Assessment
4. Safety Systems Design
5. Material Handling Equipment Selection
6. Emergency Response Planning
7. Environmental Impact Assessment
8. Permitting and Regulatory Compliance
9. Training and Education
10. Security Systems Design
11. Sustainability and Energy Efficiency

We ensure your project starts safe, stays compliant, and operates efficiently for its entire lifecycle. We focus on the "P" (Plan) stage of your operations to avoid costly risks later.

2. Compliance Assurance & Operational Systems

Core Focus: Implementing, Certifying, and Governing Robust HSSEF Management Systems to Ensure Sustainable Compliance and Continuous Improvement.

This category moves beyond initial design to focus on the daily execution and long-term sustainability of your safety and risk programs. We provide the systems and assurance necessary to meet regulatory mandates and achieve global standards like ISO certification.

Comprehensive Management Systems

Sustainable Safety Management System (SMS) Implementation

1. Safety Management System (SMS) Development (based on recognized global standards)
2. Safety Policy Development for your business
3. Safety Program Development
4. Safety Training and Education (Foundational)
5. Safety Compliance Audits
6. Incident Management and Investigation (System level)
7. Safety Performance Metrics and Reporting
8. Emergency Preparedness and Response Planning (System level)
9. Safety Culture Enhancement
10. Ongoing Support and System Maintenance

ISO 45001 Certification Assistance

1. Gap Analysis
2. System Development
3. Documentation Support
4. Training and Awareness
5. Internal Audits
6. Corrective Actions and Continual Improvement
7. Management Review
8. Pre-certification Assessment
9. Certification Audit Support
10. Post-certification Support

Product Stewardship

1. Environmental Impact Assessments
2. Lifecycle Analysis
3. Design for Environment
4. Regulatory Compliance
5. Supply Chain Management

1. Recycling and Waste Management
2. Product Take-Back Programs
3. Education and Training
4. Green Marketing and Communication
5. Auditing and Certification

Responsible Care

1. Compliance Assistance (Voluntary chemical industry initiative)
2. Risk Assessment and Management
3. Process Safety Management
4. Environmental Management Systems
5. Health and Safety Programs

1. Performance Metrics and Reporting
2. Auditing and Verification
3. Stakeholder Engagement and Communication
4. Supply Chain Management
5. Continuous Improvement and Best Practices

Compliance Assurance & Performance Benchmarking

1. Safety Audit (General Audits)
2. Hazard Identification and Risk Assessment
3. Safety Management System Development (Audit focus)
4. Compliance Monitoring and Reporting
5. Safety Culture Assessments

1. Training and Education (Audit focus)
2. Incident Investigation and Analysis
3. Emergency Preparedness and Response
4. Performance Metrics and Benchmarking
5. Continuous Improvement Support

C-TPAT Audit

1. Gap Analysis (Customs-Trade Partnership Against Terrorism)
2. Security Policy and Procedure Development
3. Risk Assessment
4. Security Audits and Compliance
5. Documentation and Record-Keeping

We provide the structure and assurance your business needs to operate globally with confidence. We handle the "D" (Do) and "C" (Check) of your safety cycle, converting policy into measurable, certified performance.

3. Emergency & Crisis Resilience

Core Focus: Preparing for, Managing, and Rapidly Recovering from High-Impact Incidents, Crises, and Disruptions to Protect People, Assets, and Reputation.

Resilience is the ultimate test of an organization's safety systems. Our services move beyond simple compliance to build a robust framework that ensures rapid response, minimized impact, and swift business continuity following any crisis or emergency.

Business Continuity & Disaster Recovery Management

1. Business Impact Analysis (BIA)
2. Business Continuity Planning
3. Risk Assessment and Risk Management
4. Technology Recovery and IT Disaster Recovery Planning
5. Crisis Management Integration
6. Training and Awareness Programs
7. Business Continuity Testing and Exercises
8. Supplier and Vendor Management
9. Crisis Communication and Public Relations
10. Continuous Improvement and Recovery

Comprehensive Crisis Management

1. Risk Assessment and Preparedness
2. Crisis Response and Coordination
3. Crisis Communication and Public Relations
4. Stakeholder Management
5. Media Monitoring and Analysis
6. Incident Investigation and Analysis
7. Training and Simulation Exercises
8. Business Continuity Planning (Crisis focus)
9. Legal and Regulatory Compliance
10. Reputation Management and Recovery

Incident Management & Investigation

1. Incident Response Planning (Detailed)
2. Incident Reporting Systems
3. Incident Investigation (Root Cause Analysis)
4. Corrective Action Planning
5. Communication and Notification
1. Employee Support and Counseling
2. Regulatory Compliance (Reporting)
3. Lessons Learned and Knowledge Sharing
4. Incident Performance Metrics and Reporting
5. Integration with Health and Safety Programs
6. Continuous Improvement and Audits

Emergency Management (All Hazards)

1. Risk Assessment
2. Emergency Planning
3. Training and Education
4. Emergency Operations Centre (EOC) Support
5. Crisis Communication
6. Resource Management
7. Incident Command System (ICS) Implementation
8. Damage Assessment and Recovery Planning
9. Exercise and Drill Coordination
10. After-Action Reviews

We provide the definitive planning, training, and systems required for the "C" (Check) and "A" (Act) stages of your safety cycle, ensuring your business is resilient and prepared to protect people and assets when it matters most.

4. Specialized Assets & Technical Services

Core Focus: Ensuring the Safety, Integrity, and Compliance of Complex, High-Risk Physical Assets, Equipment, and Specialized Systems.

These services provide the specific, in-depth technical expertise required to manage the operational risks associated with specialized infrastructure, machinery, and highly regulated physical environments. We ensure your critical assets are compliant, maintained, and safe for use.

Asset Integrity Management (AIM)

Ensuring the continued fitness-for-purpose of equipment and infrastructure.

- Inspection & Testing Programs
- Corrosion Management Strategies
- Fitness-for-Service Assessments
- Maintenance Optimization
- Risk-Based Inspection (RBI) Implementation

Process Safety Management (PSM)

Preventing catastrophic incidents in facilities that handle hazardous chemicals.

- Hazard and Operability (HAZOP) Studies
- Process Hazard Analysis (PHA)
- Mechanical Integrity Programs
- Management of Change (MOC) for Processes
- Pre-Startup Safety Reviews (PSSR)

Electrical Safety & Arc Flash

Protecting personnel and equipment from electrical hazards.

- Arc Flash Hazard Analysis
- Lockout/Tagout (LOTO) Procedure Development
- Electrical System Audits
- Preventive Maintenance Program Review
- Grounding and Bonding Verification

Fire Safety & Protection Systems

Designing and implementing systems to prevent and mitigate fire risks.

- Fire Risk Assessments
- Fire Suppression System Design & Review
- Emergency Egress Planning
- Passive Fire Protection Consulting
- Fire System Maintenance Oversight

Pressure Systems Safety

Ensuring safe design, operation, and maintenance of pressure equipment.

- Pressure Systems Risk Assessments
- Written Scheme of Examination Development
- Competent Person Services
- Pressure Relief Device Sizing & Documentation
- Pressure Equipment Directive (PED) Compliance

Lifting Equipment & Operations

Safe use and management of cranes, hoists, and other lifting devices.

- Lifting Operations Planning & Review
- Lifting Equipment Thorough Examination
- Competent Person for Lifting Gear
- Lifting Risk Assessments
- Rigging & Slings Training Guidance

Machine Safety & Guarding

Protecting workers from hazards associated with machinery.

- Machine Risk Assessments
- Safeguarding Solution Design
- Pre-Start Health & Safety Reviews (PSHSR)
- CE Marking / UKCA Marking Compliance
- Interlock System Validation

Hazardous Area Classification

Identifying and mitigating explosion risks in environments with flammable substances.

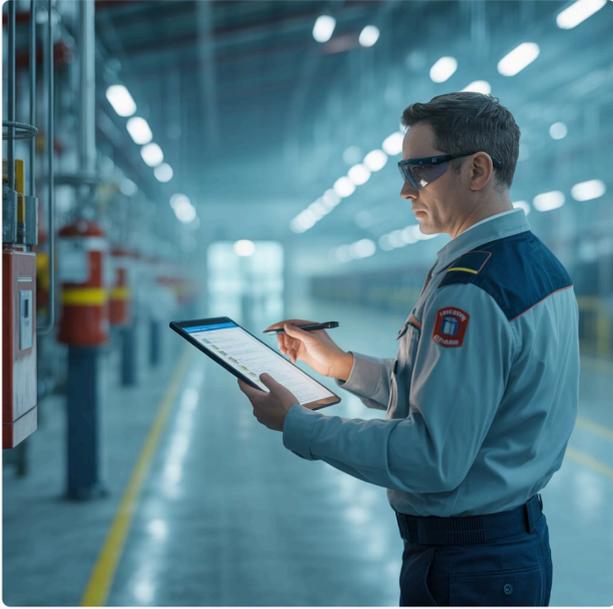

- ATEX / DSEAR Compliance Assessment
- Zoning & Classification Studies
- Ignition Source Control
- Equipment Selection Guidance
- Verification Dossier Development

We provide expert technical services and specialized asset management to ensure the longevity, compliance, and safe operation of your critical infrastructure. This focus represents the "P" (Plan) and "D" (Do) of safety, integrating detailed planning with rigorous execution for physical assets.

Fire Prevention & Fire Fighting System Integrity

Fire Risk Assessment & Code Compliance

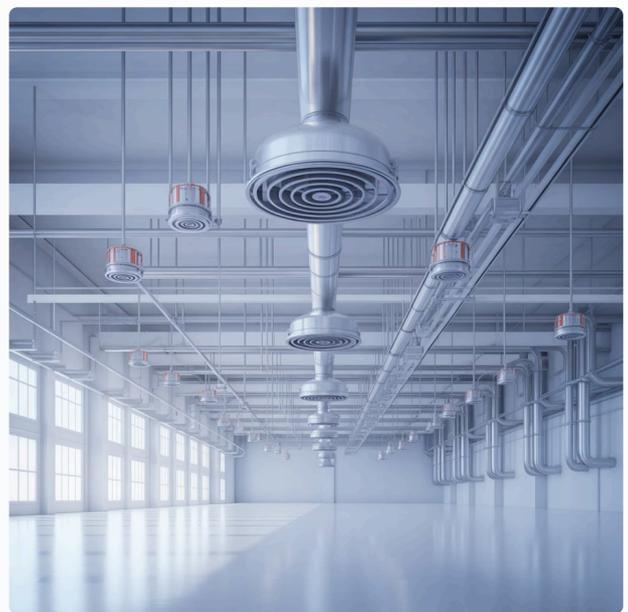

Comprehensive evaluations and adherence to safety codes to prevent fire incidents.

- Fire Risk Assessments
- Fire Safety Code Compliance
- Fire Safety Consultation

Fire Suppression & Detection Systems

Design, installation, and upgrades of advanced systems for early detection and rapid suppression.

- Fire Suppression System Installation & Upgrades
- Fire Detection and Alarm Systems
- Fireproofing & Passive Fire Protection

Emergency Response & Training Programs

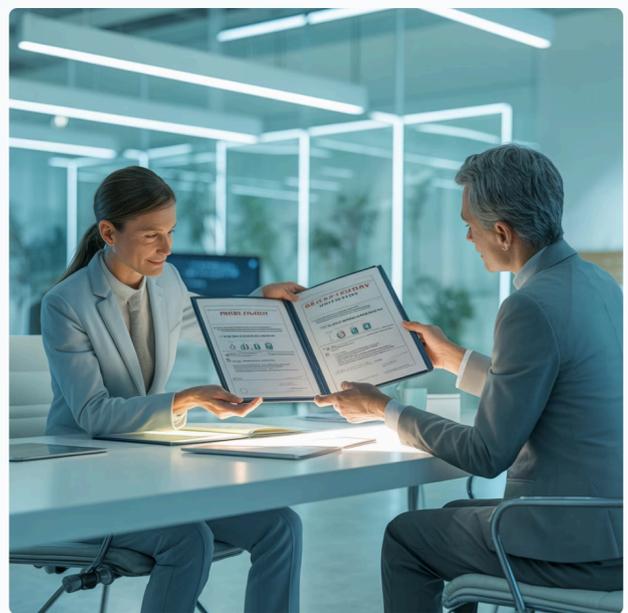

Developing plans and training personnel for effective response during emergencies.

- Fire Safety Training & Drills
- Emergency Lighting & Exit Signage
- Fire Safety Plan Development

Certification & Regulatory Liaison

Navigating regulatory requirements and obtaining necessary certifications for compliance.

- Liaison with Fire Offices
- Certifications (Form-A, B, etc.)
- No Objection Certificates (NOCs) for legal compliance

Maintenance & Performance Optimization

Ensuring continuous functionality and efficiency of all fire prevention and fighting systems.

- Fire Pump Installation & Maintenance
- Fire Extinguisher Servicing & Inspection
- Fire Alarm Monitoring Services
- Annual Maintenance Contracts (AMC) & Emergency Repairs

Management of Dangerous or Hazardous Goods

Classification, Labelling & SDS Management

Proper categorization and clear identification of hazardous materials, coupled with meticulous safety data sheet management.

Risk Assessment & Storage Procedures

Thorough evaluation of potential hazards and establishment of secure and compliant storage and handling protocols.

Transportation & Logistics Planning

Strategic planning for the safe and efficient movement of dangerous goods, adhering to all transport regulations.

Emergency Response & Training

Development of robust emergency plans and comprehensive training for personnel to mitigate incidents effectively.

Regulatory Compliance & Auditing

Ensuring adherence to all relevant regulations through continuous monitoring, audits, and compliance assessments.

Electrical & Electrical Safety Audits

Electrical Safety Inspection & Code Compliance

Thorough evaluation of electrical systems and adherence to all relevant safety codes and standards.

Load Analysis & Power Quality Assessment

Analysis of electrical loads and assessment of power quality to ensure system stability and efficiency.

Arc Flash Hazard Analysis & LOTO Procedures

Identification of arc flash risks and establishment of proper Lockout/Tagout (LOTO) protocols for personnel safety.

Emergency Power Systems Evaluation

Assessment of backup power systems to ensure reliability during outages and critical situations.

Energy Efficiency & Maintenance Assessment

Review of energy consumption for efficiency improvements and evaluation of maintenance practices for optimal performance.

Equipment & Infrastructure Services

MHE/CHE Assessments & Certification

Inspection & Performance Testing

Thorough evaluation of mobile handling equipment and performance assessment.

Safety & Environmental Compliance

Adherence to safety codes, standards, and environmental regulations.

Operator Training & Certification

Ensuring personnel are skilled and certified for equipment operation.

Risk Assessment & Maintenance Planning

Identification of risks and strategic planning for equipment upkeep.

Cost Analysis & Technical Consultation

Evaluating cost-efficiency and providing expert advice for improvements.

Elevator and Lift Safety & Maintenance

Installation, Modernization & Safety Inspections

From new installations to upgrades and regular safety checks.

Maintenance, Repair & Emergency Support

Routine service, necessary repairs, and 24/7 emergency response.

Accessibility & Energy Efficiency Solutions

Enhancing access for all users and optimizing energy consumption.

Remote Monitoring & Compliance Standards

Advanced diagnostics and adherence to all industry regulations.

Design Consultation & Training

Expert guidance on elevator design and comprehensive user training.

Security & Technology Systems

E-Surveillance and Intrusion Systems

System Design, Installation & Configuration

Video Surveillance & Access Control

Alarm Monitoring & Virtual Guarding

Data Management & Incident Response

System Auditing & Maintenance

All security and technology solutions are designed to align with operational risk, human factors, and emergency response requirements – not implemented as standalone systems.

Biometric and Credential Management Systems

Installation, Configuration & Integration

Credential & Data Management

Compliance & Performance Optimization

Emergency Response Planning

Customization & Support Services

OT/IT Safety & Cyber-Physical Security

Risk assessment for operational technology (OT) environments

Security integration of physical systems with IT networks

SCADA/DCS system security review

Energy & Lighting Systems

Solar System Safety & Performance

Design-stage risk assessment and lifecycle compliance are integral to all energy and lighting solutions.

Solar System Design & Installation

Battery Storage & Grid Connection Solutions

Performance Monitoring & Upgrades

Energy Efficiency Assessments

Financing Guidance & Training

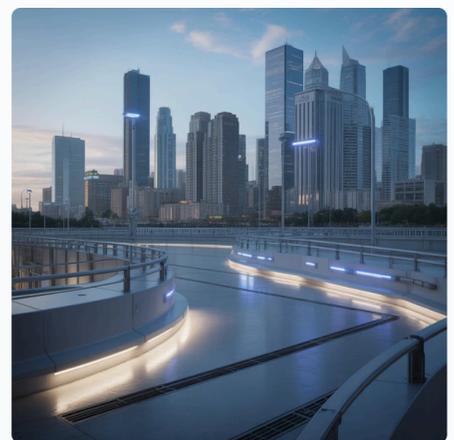

Illumination and High Mast Lighting Safety

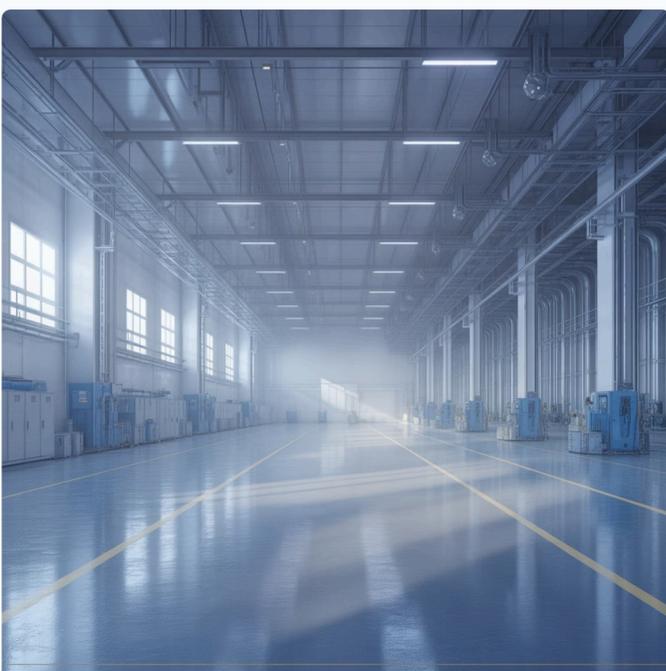

High Mast & Lighting Design Planning

Energy-Efficient Solutions & Controls

Emergency Systems & Smart City Integration

Compliance, Safety & Retrofitting

Lighting Audits & Assessments

Maritime & Port Security

ISPS Code Compliance

Security Plan Development & Training

Security Equipment & Systems

Facility Security Assessments

Compliance Audits & Certification

We assist with thorough compliance audits and facilitate certification processes to ensure adherence to ISPS Code regulations for comprehensive maritime security.

Fleet & Transportation Safety Management

Transportation and fleet operations represent one of the highest risk exposures for organizations in India and globally.

We provide structured, risk-led fleet and transport safety management solutions to control road risk, contractor exposure, driver behavior, and regulatory compliance across the entire journey life-cycle.

Logistics Risk Assurance & Fleet Audits

Driver Competency & Wellness Programs

Journey Management Planning (JMP)

Vehicle Integrity & Regulatory Compliance

Route Risk Analysis & Telematics Integration

- We provide specialized, technical mastery to safeguard your most complex assets**, ensuring full compliance and optimal safety performance across all aspects of your physical infrastructure.

5. Safety Culture Development & Training

Core Focus: Transforming Employee Behavior, Cultivating a Proactive Safety Culture, and Ensuring Competency Through Targeted Education and Certification.

Safety performance is driven by people, not procedures alone.

This category focuses on the social dimension of HSSEF — leadership behavior, workforce capability, decision-making, and ownership — enabling sustainable safety performance beyond audits and certifications.

Safety Culture Development & Customized Training

1. Hazard Awareness and Identification
2. Safety Compliance Training (Regulatory focus)
3. Emergency Preparedness and Response Training
4. Workplace Ergonomics Training
5. Personal Protective Equipment (PPE) Training (Use and Care)
6. Machine and Equipment Safety Training
7. Safety Culture and Leadership Development
8. Hazard Communication and Chemical Safety Training
9. Safety Committee and Employee Engagement Programs
10. Regulatory Updates and Refreshers

Personal Protective Equipment (PPE) Program Management

1. PPE Assessment and Selection
2. PPE Program Development
3. Training and Education on PPE use
4. Fit Testing and Personalization
5. Supplier Evaluation and Management
6. PPE Audits and Inspections
7. PPE Program Review and Improvement
8. Emergency Preparedness and Response (PPE focus)
9. Sustainability and Environmental Considerations (PPE lifecycle)
10. Compliance Monitoring and Reporting (PPE)

Investing in Your People

We invest in your people.

These services ensure your workforce is competent, engaged, and actively participating in a resilient safety culture, driving the necessary behavioral "Act" for continuous long-term safety transformation.

Partner With Global Safety Expertise

Ready to address risk at its source — before incidents, audits, or losses force change? Connect with Mr. Chandarsingh Mehta and the InSafety Services team to discuss your current challenges and explore a customized HSSEF solution.
